Pricing for up to 3,000 slides-\$12.00 per DVD plus:

OPTION 1: Archive 35mm slides to DVD-Video to play in a slide show in your set top (living room) DVD player - \$.75 each

OPTION 2: Archive 35mm slides to a JPEG FILES on CD-ROM or DVD-ROM for viewing, emailing to friends and family, or printing your own personal copies - \$.75 each

We scan the slides/photos at a high resolution so they will not appear grainy or pixilated when seen on your TV screen.

We use only RIDATA blank media, the industry standard for the highest quality

MUSIC - Choose our Dolby Digital Stereo music or your own music for the same price. For several reasons, we only work with original CDs. The primary reason is to ensure the quality of the finished DVD. We do not accept MP3s or music downloaded from the Internet because these formats are already compressed data files, which could easily result in poor audio quality on your finished DVD when it becomes compressed a second time. We never use a "burned" copy of an original CD either, because it may not be an exact copy of the original factory CD. By accepting only original factory CDs, we can control the quality of the compressed audio and therefore the quality of our own product. The "fair use act" will allow you to add your own songs to your DVDs.

VOICE COMMENTARY - You can add an additional soundtrack of YOUR OWN audio commentary to your DVD. We'll prepare a "Scratch Disc" of your movies and send it to you before we add the music and your commentary. All you have to do is sit and watch the DVD while you record your commentary onto a video camera. Send us your videotape commentary and the Scratch Disc. We'll then include your commentary as a second audio track on the DVD. The music sound track, will play by default, but if you want to change to the commentary track, simply hit the AUDIO button on your DVD remote control. We will furnish you with complete instructions explaining how to record the your commentary.
